On Anti-Philosophy (1916)

By

Martin Heidegger

I. Why this Metaphysical an Act? From Ludwig Wittgenstein to the past and present and future?

I mean in the past Wittgenstein did something, which someone else responds to and this goes as open to the question of an inquiry. How can we be more inquiring?

II. Perhaps a Fundamental Point being Raised, now do Martin Heidegger and be Free.

In fact I mean now Martin Heidegger will be loved. He means to formalize this approach more. Shift to Heidegger.
